

Visual Product Designer/Customizer

Customize VISUALY any woocommerce product

k2-service.com

We would like to thank you for purchasing Visual Product Designer/Customizer for Woocommerce.

This document covers the installation and the usage of this plugin.

If you are experiencing any difficulties or if you have any questions that are beyond the scope of this document, feel free to contact us at

plugins@k2-service.com

Overview

Do you want to allow your customers to customize the product you offer? We got you covered.

Visual Product designer/customizer is a WordPress WooCommerce Plugin which is used to design or customize VISUALY any woocommerce products like Bikes, Headphones, Sunglasses, Watches, Controllers, T-shirts and even Pizzas – no limitations!

Minimum requirements

- WordPress (minimum version 3.6)
- WooCommerce (minimum version 2.6)

Note: Before using this plugin Install [WooCommerce](#)

Installation

There are two primary methods for installing any WordPress plugin.

Install with a zip file

1. From your WordPress dashboard, choose [Plugins > Add New](#)
2. Select [Upload](#) from the set of links at the top of the page (the second link)
3. From here, browse for the zip file included in your plugin purchase titled [product-customizer.zip](#) and click the [Install Now](#) button
4. Once installation is complete, click [Activate Plugin](#) to activate it and enable it's features

Install by FTP Manager

If you have no previous web experience and have no idea what a FTP Manager is, then this option is not for you.

1. Access your host through the FTP manager
2. Access the plugins' directory of your WordPress Install [/\(WordPress directory\)/wp-content/plugins/](#)
If WordPress is installed on the root folder the directory is [/wp-content/plugins/](#)
3. Extract ZIP file. Find the directory titled [product-customizer](#) and upload it and all files within to the directory from the previous step.
4. From your WordPress dashboard, choose [Plugins > Installed Plugins](#)
5. Locate the newly added plugin and click on the [Activate](#) link to enable it's features.

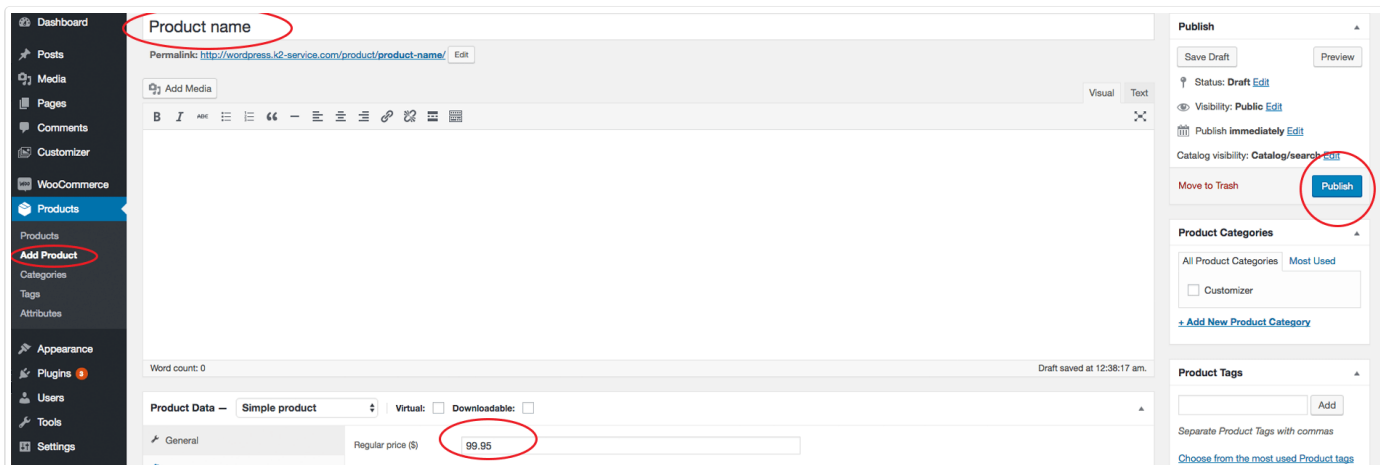

After the Visual Product Designer/Customizer is installed the new tab - CUSTOMIZER - appears in the menu

Basic settings (Before Start)

Before we start creating configurable products, we need to setup some basic settings first.

- 1) We need to ADD NEW PRODUCT and add the price. We will use this product and price for custom product later.

Basically the price for this product IS the starting price for the customizable product you want to make.

Creating customizable product

1. To create a new configuration click on **Customizer Tab > New customizer**
2. Enter configuration title - it will be the name that appears on a customizable product page
3. Choose the Template of frontend [Vertical Left, Vertical Right or Horizontal]
4. Choose how to display categories [open by default or closed]
5. Display "Add to cart" button - Choose "YES" to give an option to ADD TO CART or "NO" to give an option for preview only
6. Select product for customization - this is the product we created in **Basic Settings**
7. Press [ADD CUSTOMIZER](#) button.

Select Product ▾

Type	Name	Multiple	Icon	Sort	Enable	Options
Add Customizer						

1. ADD NAME - Category name
2. MULTIPLE - **NO** - only a single option can be selected for the category, **YES** - multiple options can be selected for the category
3. ADD ICON - Category icon
4. SORT - It gives you an option to set an order(sort) for categories
5. ENABLE - Enable/Disable any category (OUT OF STOCK OPTION)
6. PRESS **OPTIONS** - Create the SUB CATEGORIES (OPTIONS) for product

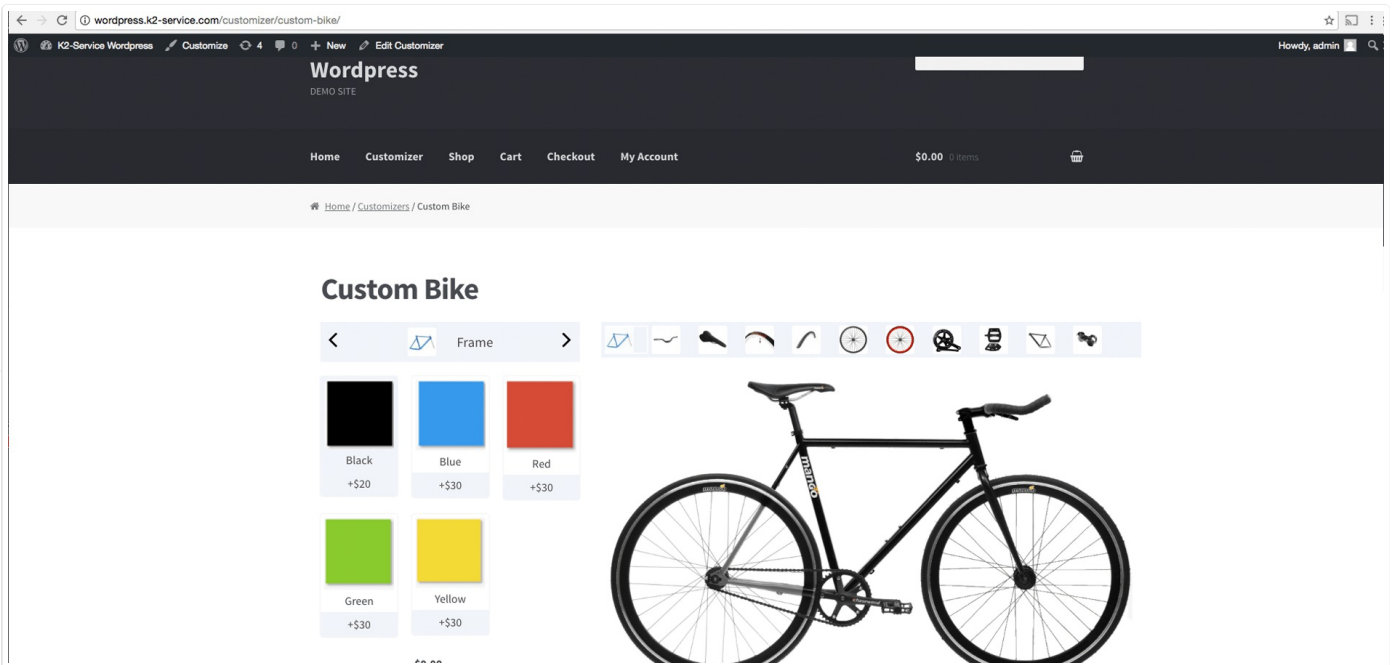

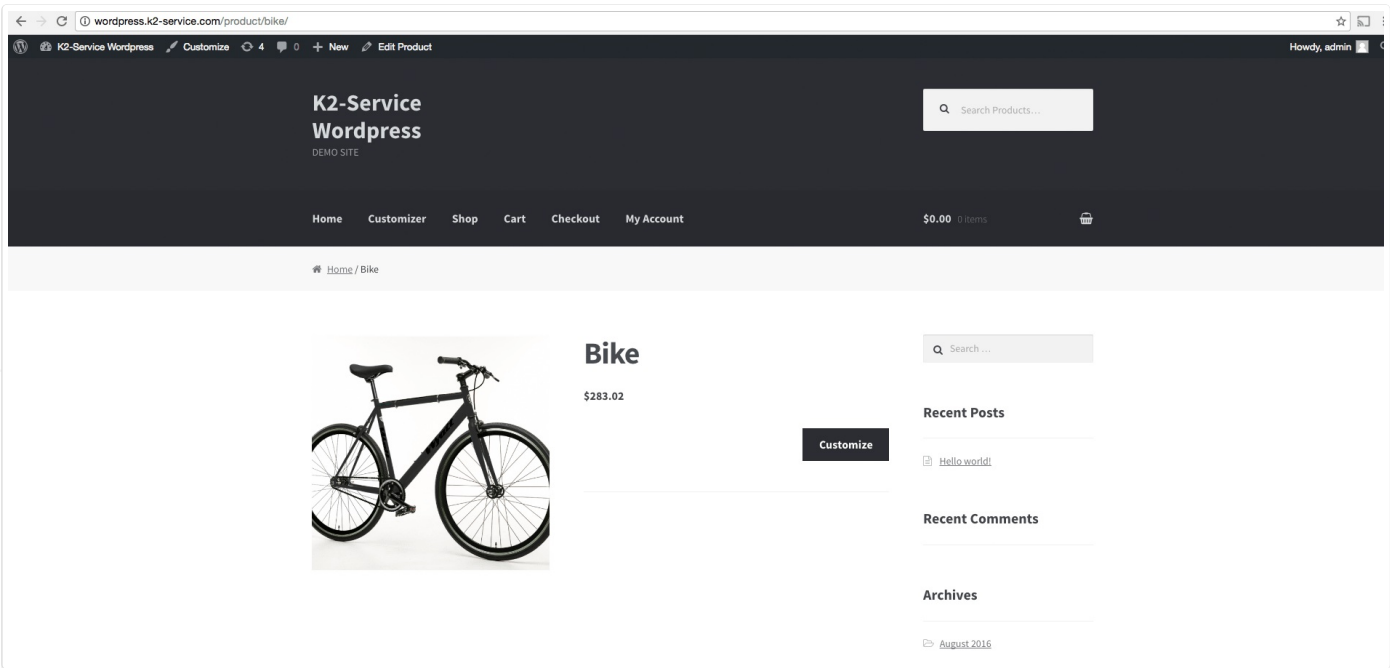

Type	Name	Multiple	Icon	Sort	Enable	Options
Image ▾		No ▾	Add Delete		Yes ▾	Options
Add Customizer						

1. ADD GROUP - Groups are the best way to group your options per category. Leave empty to ignore this setting.
2. ADD NAME - Sub category (option) name
3. ADD DESCRIPTION - Descripton for the option. Leave empty to ignore this setting.
4. ADD PRICE - Price for the option
5. ADD ICON - Option icon
6. ADD IMAGE - Option image that will be displayed within the preview area when this option is selected
7. ENABLE - Enable/Disable any option (OUT OF STOCK OPTION)
8. DEFAULT - Choose a default image. The option is good for all default objects.
9. Once you're done, click on the **Publish** button to save your configuration

Options ×

Group	Name	Description	Price	Icon	Image	Enable	Default
	Black		20	Add Delete	Add Delete	Yes ▾	Yes ▾
							

When a product is published the access to customizer can be made through the **PRODUCT PAGE** or through the link - www.yoursite.com/customizer/yourcustomizer
